# REVOLUTION MARINE GROUP

The Oceanwalker S60 Revolution Edition Embodies  
Engineering-Driven Luxury

Revolution Marine Group was founded with a clear purpose: to elevate yacht ownership through uncompromising engineering, intelligent design, and a deeply hands-on approach. Headquartered in Fort Lauderdale, Florida, the company has earned a reputation not simply as a brokerage, but also as a technical authority, one that works closely with designers and shipyards to create yachts of enduring quality and relevance. This philosophy is fully realized in the Oceanwalker S60 Revolution Edition, a yacht conceived as a seamless expression of performance, livability, and modern refinement.

The yacht is the result of intensive collaboration between Revolution Marine Group's engineering team, designers, and the shipyard. From initial concept through final delivery, Revolution's engineering experts

closely oversee every stage of the build process to ensure the highest standards of quality, performance, and durability. Every detail has been deliberately refined, from headroom and sightlines to layouts, materials, and onboard systems—resulting in a yacht that is entirely turnkey and ready for the owner's immediate enjoyment.

Architecture and flow define the onboard experience. A 27-foot, 6-inch beam and nearly 7 feet of headroom create a sense of openness rarely found in this category, while expansive glazing fills the interior with natural light. The salon is arranged with a residential sensibility, allowing the galley, dining, and lounge areas to connect effortlessly and support extended cruising in comfort.

Exterior spaces are equally purposeful and inviting. A generous aft deck and foredeck

lounge are complemented by a standout 500-square-foot flybridge—an elevated social environment with a wet bar, grill, and central helm—offering the scale and freedom typically associated with much larger yachts.

Innovation extends beyond form and layout. The Oceanwalker S60 Revolution Edition integrates a solar-assisted energy system with advanced energy management, enabling quieter operation and greater autonomy at anchor. For owners seeking the next evolution in sustainable cruising, a fully solar-electric configuration is also available in the S60e, offering an expanded vision of efficient, forward-looking yachting.

The Oceanwalker S60 Revolution Edition defines a modern approach to life on the water, where engineering mastery, design clarity, and turnkey execution converge in a confident expression of luxury.
